

Umairah Syarafana binti Mohd Zaini

Software Engineering Student

Beranang, Selangor, Malaysia | umairahzaini1602@gmail.com | 013-3807790 | [LinkedIn Profile](#)

SUMMARY

Final-year Software Engineering student (expected graduation 2027) with hands-on experience across UI/UX design, web development, and mobile app development. Experienced across the full product cycle, from user research and wireframing in Figma to building and shipping functional web and mobile applications using PHP, HTML, CSS, Figma, ASP.NET, and Flutter. Seeking a Software Engineering internship to apply and grow these skills in a professional team environment.

EDUCATION

Bachelor of Information Technology in Software Engineering (Hons)	2023 - Current
UniKL Malaysian Institute of Information Technology	
CGPA 3.71	

TECHNICAL SKILLS

Design: UI/UX Design, Wireframing and Prototyping, Usability Testing, Figma
Web Development: PHP, ASP.NET, HTML, CSS
Mobile Development: Flutter, Dart, Firebase
Programming: PHP, Front-End Development

ACHIEVEMENTS

Final Year Project Innovation Showcase	2026
Involve in FYPIS 2026 represents final year project as participant.	

ACADEMIC PROJECTS

Washhouse — Smart Laundry Pickup and Delivery Management System (Final Year Project)	2025
<i>Technologies: Flutter, Dart, Firebase, PHP, Figma, HTML, CSS</i>	
- Designed user-centered mobile interfaces and interactive prototypes using Figma. - Developed a cross-platform web and mobile application for laundry pickup and delivery services. - Integrated Firebase to enable real-time order tracking for customers. - Delivered scheduling, order tracking, and payment management features end-to-end. - Collaborated throughout the Software Development Life Cycle (SDLC).	

WajibPakai — E-Commerce Platform for Tudung Products	2025
<i>Technologies: ASP.NET, HTML, CSS, SQL Server</i>	
- Built a full online shopping platform using ASP.NET and SQL Server, covering product catalog, cart, and checkout functionality. - Developed admin-side tools for product management and inventory control.	

Event Hall Booking — Mobile App	2025
<i>Technologies: Flutter, Dart, Firebase</i>	
- Designed and built a Flutter booking application. - Implemented booking management and venue availability features.	

Virtual Forest Simulation — Large-Scale Forest Modelling System	2025
<i>Technologies: PHP, JavaScript, HTML, CSS, MySQL</i>	
Built a data-intensive simulation system using PHP, MySQL, and JavaScript to generate and analyze thousands of virtual trees for forestry research.	

UI/UX Design Concepts — Study Planner, Hospital and Banking Apps	2025
- Designed end-to-end Figma concepts for a student study planner app, a hospital appointment app, and a banking website UX redesign. - Produced wireframes through high-fidelity prototypes for each concept.
